# PANDUIT™

SFP+ Passive Copper Assemblies

Panduit is the only 3rd party passive SFP+ vendor currently Cisco certified on Nexus 2000 and Nexus 5000 series of switches. This means that Nexus solutions deployed with Panduit™ 10Gig™ SFP+ Direct Attach Passive Copper Cable Assemblies are automatically supported by Cisco's Technical Assistance Center

Description: High speed 10GHz twin axial cable assembly with SFP+10Gbps hot pluggable modular connectors on each end. Available in 1M, 1.5M, 3M, 5M, 7M and 10M lengths and in the following colours: BL=Black, BU Blue, GR=Green, RD=Red, WH=White. Other colours and lengths are available.

Comstor™
a Westcon Group company

Key Features	Benefits
100% Performance Tested	Confidence that each assembly delivers specified performance for ensured network availability
Low Latency Performace	Ideal for high performance computer clustering and other latency sensitive applications
Passive Low Power Assembly	Provides a low cost short reach interconnect option with no additional power draw
Low Profile	Robust easy-to-use connector latching feature allows easy installation in belly-to-belly high density installations
Small Diametre cable design	Enables proper cable management and improved air flow
Variety of lengths	Available 0.5 to 7 meters (0.5 meter increments) for design flexibility and optimum airflow
Variety of Colours	Available in Blue, White, Black, Red, and Green for easy identification of multiple networks and fabrics
